# Our Products & Services

## About Us

With a diversified portfolio in the areas of **Energy Storage System, Solar Energy Systems, Rooftop Solutions, Electric Vehicles and Charging Infrastructure, Expert Consultation, Solar PV Trainings and Third Party Inspections.**

With a vision to bring a positive change in the world through upholding quality, performance, and customer centricity in offering comprehensive and sustainable solutions for your business.

Our work is powered by ethical business ideologies and our experience garnered from different business sectors have enabled us to offer you comprehensive solutions and quality assurance, setting new benchmarks in industries and service sectors.

# Why Choose Us

## GROUP CORE VALUES

**EARN TRUST:** We listen attentively, speak candidly and treat each other with respect, driving cross functional synergies to build long term relationships. Trust and transparency remain at the core of all that we do.

**INNOVATE & SIMPLIFY:** We believe in keeping things simple. We imagine, we invent and design better and faster ways of doing things.

**EXCELLENCE OR NOTHING:** We believe in continuously raising the bar for ourselves, setting new benchmarks and delivering the highest standards of performance.

**CUSTOMER OBSESSION:** Customers are the reason why we exist, and all our actions are directed to ensure the ultimate customer delight. A happy YOU creates happiness within.

**OWNERSHIP:** We take accountability for what we do, keeping organisational objectives at the forefront. It's not about "my work is done", it's about reaching the final goal.

**INTEGRITY:** We conduct our business ethically, follow the law of the land, and do the right thing at all times.

**HIRE & DEVELOP THE BEST:** We hire the best, value their contribution and grow, and nurture them to create future leaders.

**CO2 Emissions Reduced: 4818 Tons per year with Solar Plants Installed**

**GHG emissions Reduced: 810 Tons per year with Electric Vehicles delivered**

**Highly Qualified Staff with more than 6+ years' experience**

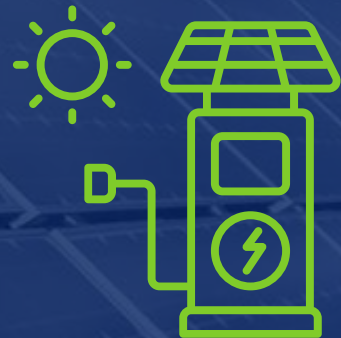

## Major Client Institutions

## Solar Energy makes sense

Solar technology has proven to not only be the most efficient energy alternative, but it is also an extremely profitable and reliable investment. Building owners who make the switch not only generate clean energy, but they will also make thousands of rupees in savings over the solar system's lifespan. Home and commercial building owners are losing money every month on their electricity bills. Investing in solar gives one control of their energy costs, and once the system itself is paid for, electricity becomes free for the next 20 or so years!
