Promoting Industry-Academia Synergy:

Bridging the Gap Between Academia and Industry: Industech Solutions plays a role in bridging the gap between academic learning and industry requirements.

Encouraging Research and Innovation: The collaboration may extend to encouraging research and innovation projects that align with the company's focus on IoT product designing and automation.

By engaging with students from diverse educational backgrounds and providing them with practical experiences, Industech Solutions contributes not only to the development of skilled professionals but also to the growth of the overall talent pool in the manufacturing and automation sectors.

The purpose of Industrial training :

1# To develop skills that meets industrial requirement:

You all know that skills are very important to develop while in college itself because all the industries are expecting skills from the students, but college academic subjects do not meet the industrial requirement.

2# To get the industrial exposure and to gain Practical knowledge :

When students start working in industries , then they will gain practical knowledge of their subjects , they get industrial experience , they will understand how to work in a team. They will also understand how to solve any particular problem in real time , critical thinking , by talking with other trainees or employees improves communication skills.

You will understand company requirements , their clients , how to obey superiors , how to attend interviews etc.

3# Easy access to industries to get the desired Job in future:

When you work in any company then you not only gain the knowledge but also get the access to other companies , build the network , this gives more opportunities.

4# Gives value to your Resume:

It is a well known fact that your resume is the face of your talent and skills that you have. When you are applying for any kind of job in your career then the interviewer asks for a resume and in the resume first they look at your skills that you gained during your college days.

The industrial training for 6 months in any company and the certificate that you receive after training adds more value to your resume. You can include what you learned during industrial training , skills gained , practical knowledge on systems , software and tools.

Once you understood the purpose of industrial training ,now you must understand how you get all these things at Industech Solutions.

High Paying and Demanding skills at Industech Solutions:

Industech solutions offer different domains for all the branches. These domains are advanced high paying domains.

Training for you in these domains will be taken by industrial experts who are already working in top industries , MNCs and in Govt sectors.

The trainers will teach these domains theoretical , Practical , Industrial exposure , they will start from scratch and build a skill for you so that you are very much ready to work in any company in a particular domain.
