

SANJOG
INFINITE

Let's add value together by process engineering

Sanjog Brass Products

Sanjog, is an Indian entity. Established in 2015, Sanjog will support beyond what is expected from a high quality precision engineering company. We are capable and ready for new challenges and look forward to supporting your requirements.

INDIAN – ISO 9001:2015 Certified. With consistent growth, we are manufacturer of custom metal components from **copper, brass, lead-free-brass and bronze** from India. Today, the company producing millions of parts every month ranging from 2 mm to 200 mm for using in industries like Automotive, Electrical, Fire Prevention, HVAC, Oil and Gas, Plumbing, Pneumatic, Plastic Rubber Molding, Telecom and many more.

At Sanjog, we offer a comprehensive array of machining capabilities ensure that our jobs always confirm to specifications. Process engineering is the key to manufacturing capabilities. We engineer the process for optimum cycle time resulting in an affordable price and high value. Our team members are dedicated to continuous improvement in every aspect of our business from customer inquiry to after sales service.

Vision & Mission Statement

Vision

“We intend to provide our customers with the best products and services using world class technology. We want to be an ethical organization in which our stakeholders feel proud to be associated.”

Mission

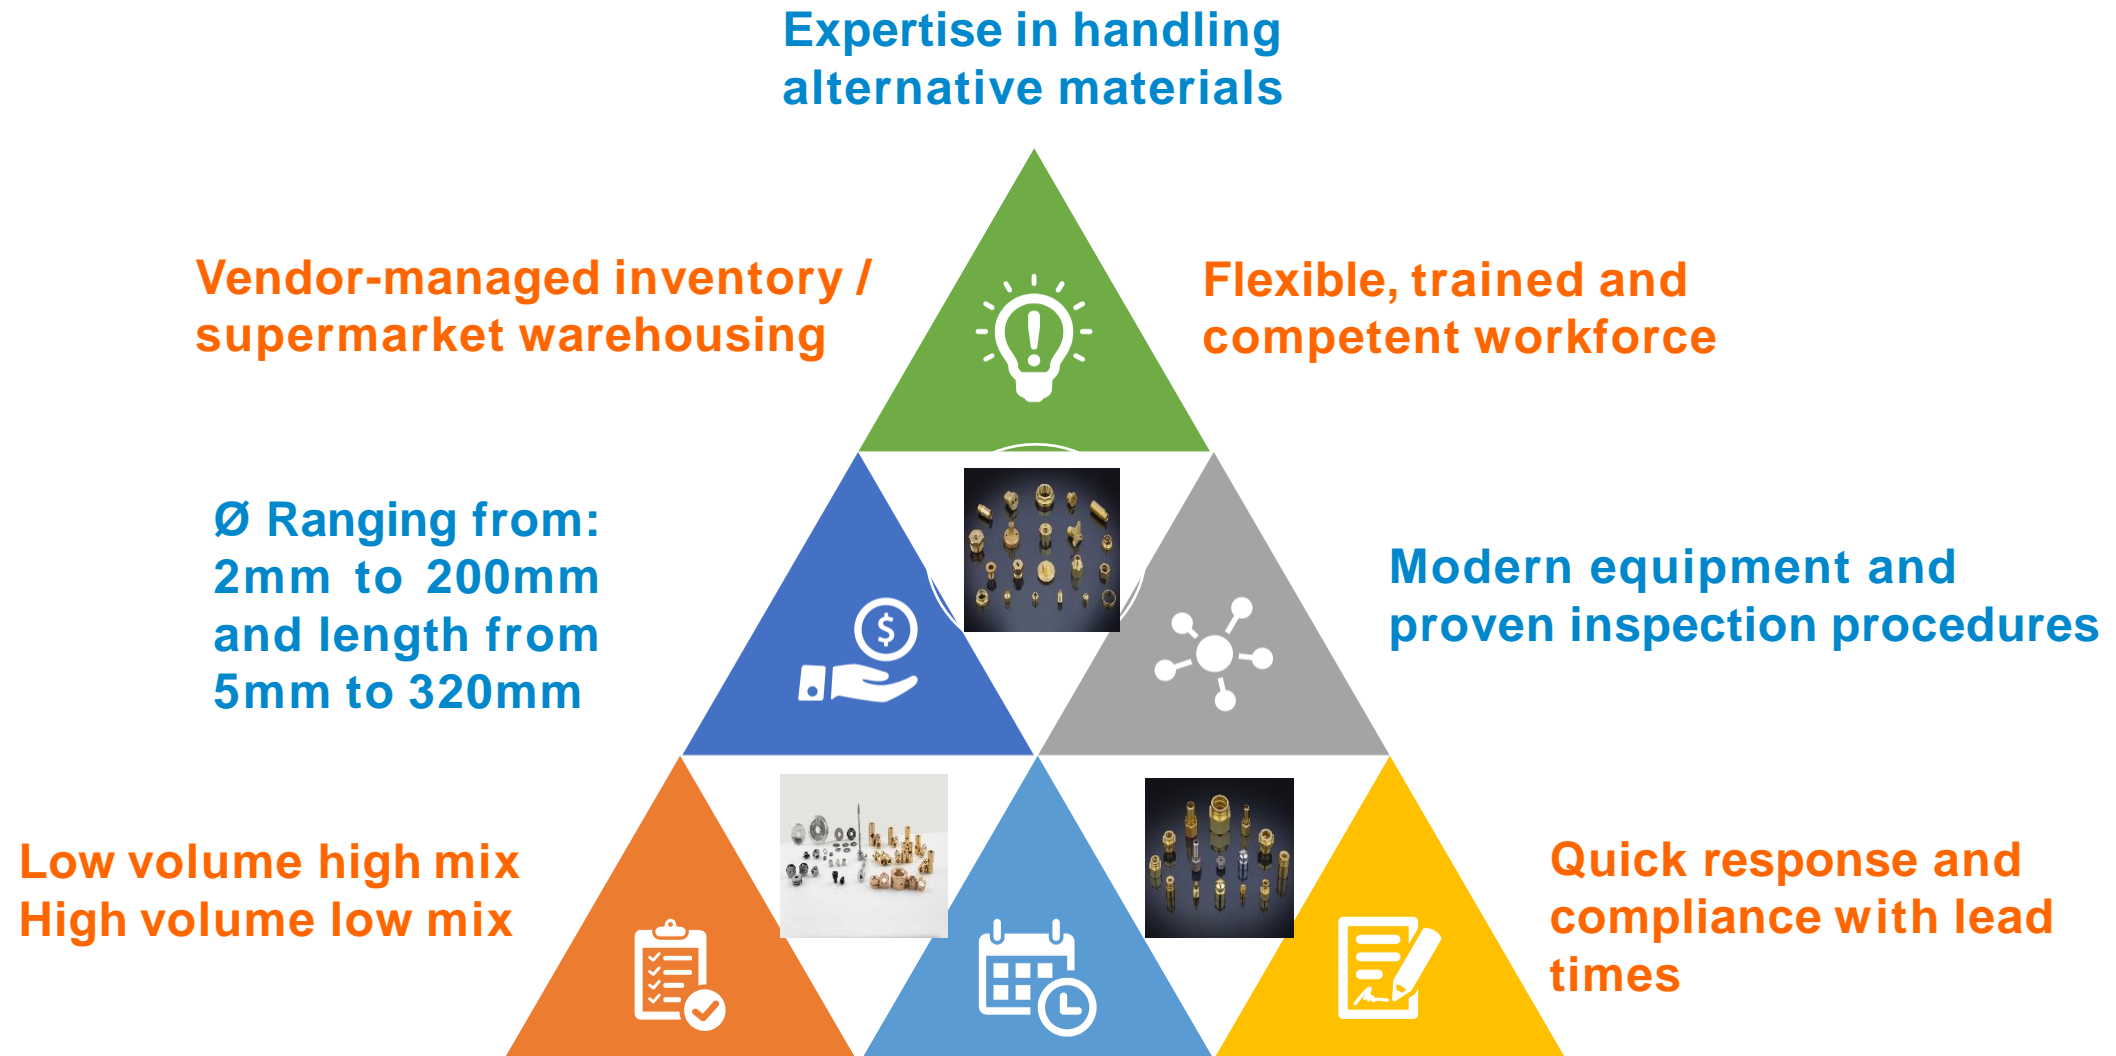

“To produce variety of engineering components using world class technology and get 100% customer satisfaction in every area of business from product development to after sales service.”

Advantages

Every potential customer enjoys several specific advantages that come with our service:

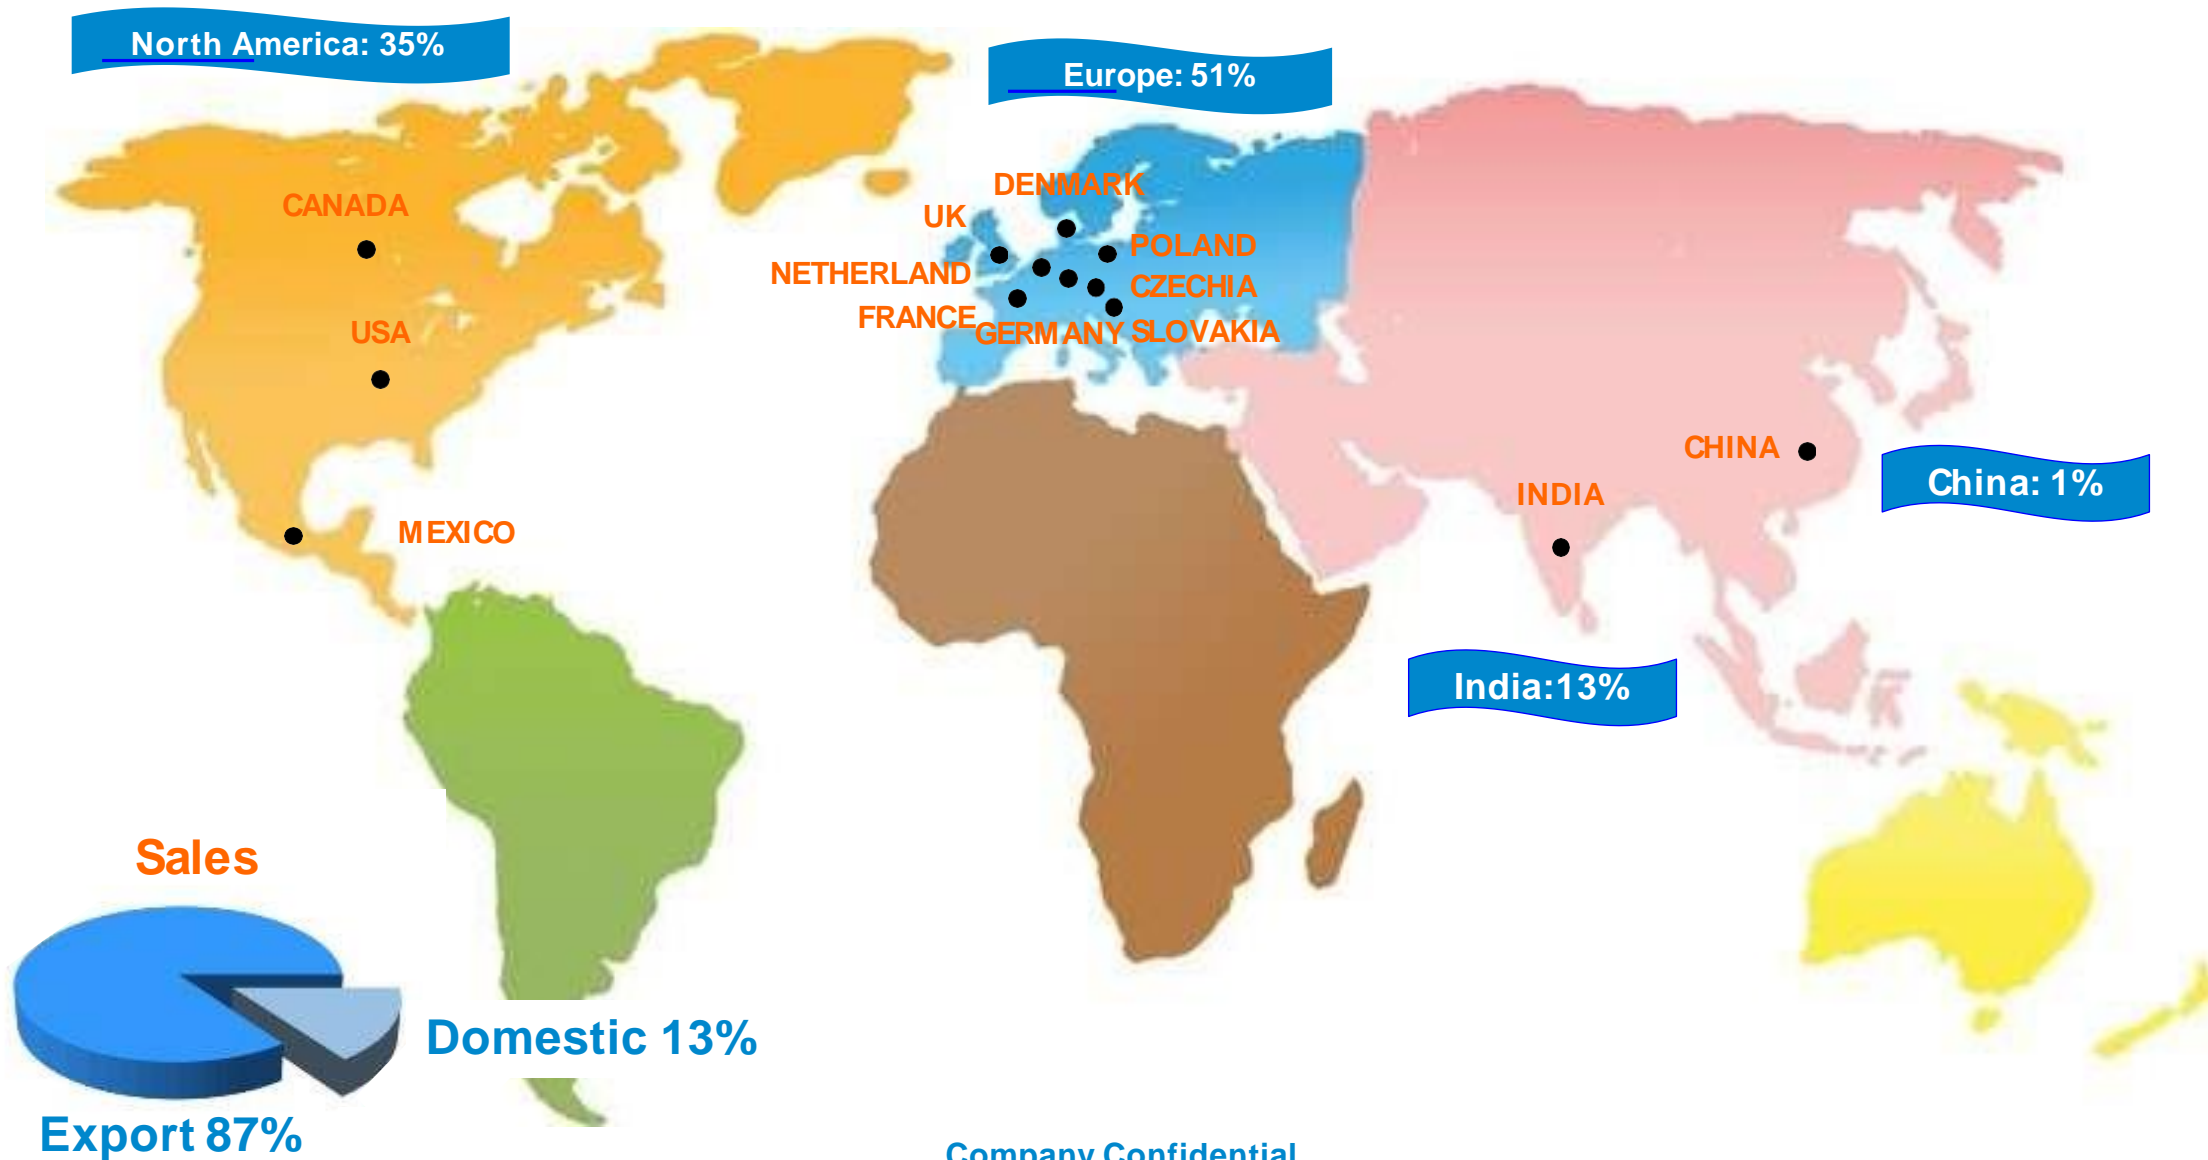

- **Expertise in manufacturing machined parts using alternative metals and in various sizes**
- **Production facilities to support both low and high volumes**
- **Flexible and competent workforce**
- **Quick response and compliance with lead times**
- **State-of-the-art measuring metrology**
- **Competitive pricing based on micro costing technique**
- **Customised boxing and packaging**
- **Logistics and shipment support**

Global Customers

Business Sectors

- Agriculture machinery
- Automotive
- Defence – Light weapons
- Electrical & Power
- Electronics
- Fire & Safety Equipment
- Fluid Control products
- Food equipment
machinery
- Fuel, Oil & Gas equipment
- Hydraulics
- Industrial actuators
- Industrial valves
- Plastic moulding
- Printing machinery
- Pumps
- Refrigeration controls

Key Differentiators

Differentiators

At Sanjog, we continue to enjoy an increasing volume of sales year after year. This has been brought about by our ever-expanding customer base, and 4 defining factors that give us the competitive edge in our business field.

1. Metal Excellence

Ever since our beginning, we have explored several emerging and untapped possibilities in the market. Our thirst for innovation has led us to manufacture precision machined parts using **copper, brass and lead-free-brass** . We are today a one-stop- shop for our customer's machined parts requirements which gives us a competitive edge in the industry.

Key Differentiators

2. Strategic location for raw material availability and export shipping

Among the critical advantages that work in our favour is the location and logistics factor. Jamnagar are ideally located to secure the benefits of our strategic location.

Raw material sources are available within a short distance from our plants.

Accessible by road, rail and air, transportation is easily available. This makes it possible to bring in raw materials and ship finished product to destinations world-wide keeping sharp lead time.

Key Differentiators

3. Assembly and Testing

Providing our customers value added services makes Sanjog the **choice partner** for customers out of all business sectors.

Plant have the capability to manufacture **high precision parts**, and if required, we assemble them with crimping, coining, welding or screwing processes.

In addition **testing** them on hydraulic/pneumatic machines to ascertain leak-proofing for example **before packing and shipping** them world-wide.

Key Differentiators

4. Process enhancement

Over the years, having analysed ourselves against international competition, we discovered ways and means to improve our manufacturing process; making it even more precisely, competitive and cutting edge.

We continue to find ways and means to compete globally by:

- Enhancing the manufacturing processes
- Flexibility in providing customers with high volume-low mix and low volume-high mix
- Business value proposition
- Providing value added services to the customer
