## PROJECTS

### DISEASE PREDICTION BY SYMTOMS

Machine Learning

This project aims to develop a machine learning model that can predict the likelihood of specific diseases based on relevant patient data. By analyzing historical medical records and leveraging advanced algorithms like KNN and Random forest , the system will assist healthcare professionals in early disease detection and risk assessment, ultimately improving patient care and outcomes.

## EDUCATION

- Geethanjali college of enginnering technology 3-2present  
Btech,Information Technology CGPA: 7.3
- Srichaitanya junior college 12/06/2018- 10/11/2020  
Intermediate,MPC Percentage-70%
- Sai Siddhartha High school CGPA-8.8  
SSC,10th

## SOFT SKILLS

### Team management

Dedicated team member

### Time management

Goal setting

### Communication

specch,Active Learning

### Quick Learner

Decision making

## INTERNSHIP

Under going internship with Udemy  
On full stack web development

## TECHNICAL SKLLS

C  
Java  
python(basics)  
MS-Word  
MS-power point

## INTERESTS

Playing batminton,  
practicing Taekwondo,  
Drawing and craft work,  
Social Activities  
Planning for Outing with friends.

## LANGUAGES

English Telugu Hindi

## CERTIFICATIONS

- Certificate for completing  
**Artificial Intelligence from languify**  
-1stop
- Certificate of completing Training and  
project on **INTERNET OF THINGS**
- Cantilever  
**Certificate of completion in**  
**Dataplus**
- TCSasterCraft  
Certificate of participation  
certificate In **ETHICAL HACKING**
